

New Product Release

Nexus Construction Systems is happy to announce our latest addition to our product line, the Magnetic Recess Void Former!

The Magnetic Recess Void Former has been created with adaptability, ease of use, and reduction in production costs in mind. It has been developed with a strong inbuilt magnet to allow for adjustable positioning within metal forms without the need to weld in a Steel Void Former, thus allowing the same steel cast to be used for multiple casts rather than a permanent design.

Our Magnetic Recess Void Former is available in 1.3t, 2.5t and 5t sizes and have specifically designed Void Former Rubber Rings to suit each option. Please see below new product codes;

- Magnetic Recess Void Former Steel – 1.3t - **P571MG**
- Magnetic Recess Void Former Steel – 2.5t - **P572MG**
- Magnetic Recess Void Former Steel – 5t - **P575MG**
- Void Former Rubber Ring For Magnetic Steel – 1.3t - **P581MG**
- Void Former Rubber Ring For Magnetic Steel – 2.5t - **P581MG**
- Void Former Rubber Ring For Magnetic Steel – 5t - **P581MG**

Please feel free to contact one of our friendly staff members for pricing or further information.
